

THE DOOTHAN EAGLE

DOOTHAN'S POPULATION: 1800, 247; 1900, 3,278; 1910, 7,016; 1920, 30,000. "FOR I HEARD THEM SAY, LET US GO TO DOOTHAN."

VOLUME 6

DOOTHAN, ALABAMA, FRIDAY AFTERNOON, MARCH 12, 1918

WEATHER
Fair tonight and Saturday.

JOINT LEGISLATIVE COMMITTEE OF THE JUDICIARY WILL MEET IN DOOTHAN ON MARCH 29

Eleven Cities in the State to be Visited by Committee Rather Than put State to Expense of Having Witnesses Go to Montgomery.

Committee Composed of Eight Members.—Five from House and Two from Senate.

The Joint Legislative Committee named by both houses to sit during the vacation, has concluded to visit several different cities in the state for the convenience of those who might want to take matters before the committee. They figure that it would come cheaper to the State for the committee to visit these points than it would to have witnesses summoned to Montgomery, and a schedule has been named.

Following is a copy of the resolution passed, giving the dates on which each of the following cities will be visited:

Itinerary of Recess Judiciary Committee.

"Resolved, That in view of the fact that this Committee can visit prominent places in the State at much less expense (only our railroad fare to be charged to the State) than witnesses and others from such places can come to Montgomery, the Committee will hold special sessions as follows:

"At the reading rooms of the Moulton Hotel in Birmingham on March 15th to 19th inclusive.

"At the Court House in Jasper, on March 20th.

"At the Court House in Tuscaloosa on March 22nd.

"At the Court House in Decatur on March 23rd.

"At the Court House in Huntsville, on March 23th.

"At the Court House in Gadsden,

UNCLE DUNCAN GETS NEW JOB

To the gratification of his friends "Uncle" C. F. Duncan, who operated a small restaurant in Dothan, has been appointed day watchman at the Capitol in Montgomery by Governor Chas. Henderson.

"Uncle" Duncan is a Confederate Veteran, and has many friends here who believe that the appointment could not have been given to a more deserving man.

All persons at such places and adjoining territory interested in the work assigned this committee are earnestly requested to attend the session most convenient to them and submit such suggestions and information as may be deemed of assistance to the committee. They figure that it would come cheaper to the State for the committee to visit these points than it would to have witnesses summoned to Montgomery, and a schedule has been named.

The foregoing resolution was on this date unanimously adopted and the undersigned directed to give it such publicity as could be secured without expense to the State.

March 11th, 1918.

W. C. Davis, Chairman.

The committee comes to Dothan on Monday, March 29th and will be at the court house.

Following members of the senate are on the committee: John A. Lusk, Atto V. Lee, J. C. Miller, and from the House there are: W. C. Davis, chairman; Sam Will, John, A. R. Brindley, D. C. Blackwell and Ira P. Thompson.

IN MAYOR'S COURT.

Charged with crossing the "dead" line for automobiles at one of the passenger stations, J. A. Cobb was arraigned in Mayor's court today, fined \$5.00 and sentenced to 15 hours labor for the city. An appeal was taken.

At the Court House in Tuscaloosa on March 22nd.

At the Court House in Decatur on March 23rd.

At the Court House in Huntsville, on March 23th.

At the Court House in Gadsden,

Man Held On Charge Of Stealing Horse And Buggy Recently

With the arrest of Homer Givins at Browns Cross Roads last night by Chief Deputy Sheriff Alex May, the mystery of the disappearance of a buggy, belonging to E. L. Smith, and a horse that is the property of Jim Hughes, a negro, is believed to have been cleared. Deputy May was accompanied by John Sanders.

A few weeks ago a horse and buggy was stolen from a wagon yard in Dothan by an unidentified party, who drove the team to another wagon yard and exchanged the old buggy for a better one with rubber tires. Efforts to apprehend the culprit failed.

Through some private source of information, a clue was obtained and the arrest of Homer Givins, who was locked in the county jail, followed. It is said that the horse and buggy were recovered and left in Honduras for the owners.

Homer Givins, according to information from the Sheriff's office, has confessed to the charges brought against him.

Friends of Mrs. B. P. Montgomery will regret to learn that she is in a local infirmary.

Send your best girl a box of nice home made candy from Birmingham, and see how she will smile on you.

Leahann Moore went to Coffee Springs today on business.

Look for Greene's 10c Store circulars—it will tell you something.

800 Soldiers Die But No Requiem Sung

Eight hundred, more or less "dead soldiers" lie upon the battlefield near the cemetery. Sheriff John A. May is the guilty party, the man responsible for this wholesale slaughter. The "men" were captured alive in recent skirmishes, their execution decreed, and the death warrants executed.

The executing officers admit the "soldiers" fled profusely, and the earth was soaked in "gore." Each of the offenders against the law and dignity of Alabama—the prohibition laws—were "knocked in the head." No changes of any of the criminals being left kicking were taken, as they might have been rescued.

The German Reichstag, after a one-day session, has recessed to March 18 to give the committee time to arrange work.

It is reported in German naval circles that eleven submarines have been lost since February 18. The loss of four has been officially admitted, while seven have been missing for nearly three

SILENCING OF MORE TURKISH GUNS BY FLEET REPORTED

No Italian Ships Seen. Batteries Engaged by Night by Aeroplane from Fleet.

By Herbert Temple.

London, March 11.—The silencing of more Turkish guns on the Asiatic side of the narrow in the Dardanelles by the Anglo-French fleet was announced in dispatches received today from Athens.

These stated that hidden batteries, lying between Kephez and Chanak, had been put out of commission by projectiles from the heavy guns of the war ships. The dispatches did not say, however, from now.

The delegates to the Selma convention returned last night in high spirits over their victory, which will bring some 2,000 delegates to this city in 1917.

Reidy reached town yesterday morning, and during the day met and talked with officers and directors of the baseball association. A meeting was held yesterday afternoon, and another last night, but the final agreement was not reached until today.

When Dothan put in his bid for the next biennial convention, Harry K. Martin made the speech extending the invitation on behalf of the local lodge, but he was cheered so much that he cut his speech short. Yells of "Dothan, Dothan!" swept the hall.

What Martin did get to say he said well, judging from the applause.

At the meeting March 22 the delegates will tell of the Selma convention, and some initiatory work is also scheduled to take place. Their plans will be discussed.

New Officers.

Dr. A. B. Horn, of Union Springs, is Head Consul of the Woodmen of the World for Alabama, succeeding Hon. D. J. Denney of Tuscaloosa. Announcement of Dr. Horn's election came at 8 o'clock Thursday morning after a committee had put in the whole of the night counting the votes from Wednesday's election. Dr. Horn headed the original ticket and swamped his opponent for the office, W. E. Verby.

Other officers elected were Dr. H. A. Elkourie, Birmingham, Head Adviser; W. W. Bondy, Carrollton, Head Bunker; A. E. Overton, Huntsville, Head Clerk; B. A. Cook, Montgomery, Head Escort; M. G. West, Hartselle, Head Watchman; J. E. Brewster, Andalusia, Head Sentry. Head Managers elected are G. H. Younger, Fairfield; H. K. Dickerson, Opelika; Andrew Vermeille, Mobile; W. C. Day, Selma; O. S. Walker, Easley, Sovereign. Representatives are Dr. W. M. Crawford, Birmingham; Guy Scipio, Mobile; T. L. Powell, Tuscaloosa; Charles Pfleister, Birmingham, and D. D. Holloway, Montgomery.

It is reported from Tenedos that some of the guns upon the war fleet had been silenced by projectiles from the land batteries, but considering the importance of the successes achieved by the French and British ships the damage and casualties from Turkish shells have been very light.

A spectacular feature of the battle was fighting at night between two aeroplanes from the fleet and Turkish shore batteries. The aviators having located the position of certain guns between Ermenek and the ruins of Dardanus, flew over the Turkish positions during the night and dropped bombs. The Turks replied with both small arms and heavy mortars. The glare could be seen for many miles, but despite the severity of the fire, the aviators escaped.

Carden in Dardanelles

Naval experts attach importance to the fact that the great British super-dreadnaught, Queen Elizabeth, has begun to bombard the inner Turkish fort with direct fire from her 15 inch guns. Another interesting and important feature of Athens dispatches was the report that Vice Admiral Sackville Hamilton Carden, the commander-in-chief of the allied fleet, has taken his flagship into the Dardanelles, and personally directed operations from a point opposite the ruins of Dardanus. That Rear Admiral Guepratte, commander of the French ships in the fleet, has entered the Dardanelles, was shown by Athens dispatches to the effect that he had a narrow escape from death when a shell exploded on the battleship Suffren.

The executing officers admit the "soldiers" fled profusely, and the earth was soaked in "gore." Each of the offenders against the law and dignity of Alabama—the prohibition laws—were "knocked in the head." No changes of any of the criminals being left kicking were taken, as they might have been rescued.

It is reported in German naval circles that eleven submarines have been lost since February 18. The loss of four has been officially admitted, while seven have been missing for nearly three

WOODMEN PLAN JUBILEE MEET

Will Formulate Plans for 1917 Convention at Meeting to be Held March 22.

To celebrate the success of Dothan in landing the 1917 biennial convention of the Alabama Woodmen of the World, the local lodge No. 431, will hold a jubilee meeting Tuesday night, March 22, and formulate plans for the entertainment of the visitors two years from now.

The delegates to the Selma convention returned last night in high spirits over their victory, which will bring some 2,000 delegates to this city in 1917.

German Cruiser Is Told She Must Leave Port Or Be Interned

Opinion in Diplomatic Circles is That U. S. Will Demand
Reparations for Damage Sustained.

JACK REIDY TO MANAGE CLUB

Newport News, Va., March 21.—The German auxiliary cruiser Prince Eitel Friedrich must leave this port before 12 o'clock tomorrow, or be interned, unless her captain can show why necessary repairs will keep her long or.

Formal notifications to this effect was served upon Captain Thierichs of the German ship this morning by Collector of the Port Norman R. Hamilton. The notice to the kaiser's commander was given at noon. The last expires in 24 hours.

Actions Take in One.

Washington, March 21.—The salient facts in the status of the German converted cruiser Prince Eitel Friedrich, now at Newport News, Va., according to the treasury department today, are:

Should the American neutrality board refuse the Eitel Friedrich permission to repair, the time limit within which the remaining a free ship extends a reasonable time after the refusal is announced.

Should the neutrality board grant the permission it is within the discretion of the American government to set a new limit within which the Eitel remains a free ship.

All passengers must be landed except the crew of the Eitel. Immigration laws will be waived so far as individual entertainment is concerned, but consuls will be required to give a blank bond covering all citizens of their respective nations.

No matter what action the neutrality board takes, the Eitel may land and return to an extent sufficient to take her to the nearest German port. These operations may go forward during the neutrality of the Eitel's case before the neutrality board.

The owner of the American grain destroyed when the William P. Bowes, of Portland, Or., under international law, was contraband.

The immigration bureau today dispatched several special agents from Washington to Newport News to handle the immigration problem raised by the Eitel's passenger list.

Although quoted statements of passengers say that they were well treated on their voyage, advice at the treasury department that the women and children are in poor health owing to their detention at sea.

By Knocked Out.

Newport News, Va., March 21.—While wireless telegrams reported eight French and British cruisers sailing toward the Virginia coast to be in wait for the German auxiliary cruiser Prince Eitel Friedrich, the United States began a formal investigation of the sinking of the American ship Wm. P. Frye today.

Collector of the Port Norman R. Hamilton, acting upon instructions from the state department, boarded the German vessel yesterday with her captain, Captain Thierichs, to ascertain the version of the destruction of the American ship.

That the German cruiser Wm. P. Frye was sunk in the harbor of Hampton Roads, Va., was known to the American authorities.

That the German cruiser Wm. P. Frye was sunk in the harbor of Hampton Roads, Va., was known to the American authorities.

Two Years of

Mr. Wilson.

The Emporia (Kan.) Gazette.

Two years ago today President Wilson took office. Probably no other president ever came into office on whom higher hopes were centered by citizens of all factions, beliefs and parties than were centered on the President three years ago today. No other President, excepting Washington and Lincoln, ever sounded in an inaugural a higher note of hope and promise. During his first year the Nation held undivided faith in its President. The belief that he would fulfill his promise was strong everywhere. It was natural that there should be more or less reaction. Such high achievement as the Nation's hopes of Wilson could hardly be realized. The reaction was felt strongly during his second year. For ten months definite anti-Wilson sentiment has been growing in the country. The President could not help feeling the antagonism to his plans. It was in the air everywhere, and particularly in those circles commonly known as reactionary. The Progressives whom the President had so aptly called "forward looking men," were mostly generally with President Wilson last year at this time. Indeed, during the campaign of 1914, the Progressives of party alignment went into the campaign praising the President for many things—chiefly for keeping the peace of the continent. All over the country party campaign workers of the third party spoke well of the President. The subsequent proceedings seemed to indicate, in a general way, that the opposition to the President was more deeply seated among the people than the Progressive leaders imagined. They probably suffered for their defense and praise of the President. Lately that antagonism has been even more manifest than it was last year.

Today, the barometer of the President's standing is at its lowest and most threatening point. All the flesh politically have been laid at his door, and lately, without just cause. That he has failed to do all the things which his inaugural seemed to promise is, of course, unquestioned. That he has been blind to certain defects of his party and its many grievous weaknesses no one can deny. The President also has tried with some success to give an air of grace. His declarations that good times exist, when they do not exist, his attempt to force

Thermos Baby Nursing System
Thermos Baby Thermometer
Thermos Baby Thermos

through auto-suggestion, a conviction of prosperity upon the people, and his various public speeches in which he has tried to make a slogan bowl over a fact in all these matters. President Wilson has failed. His failure has been obvious; it has been more obvious, in fact, than real. It is a secondary failure—this failure to force his will upon the times. And sooner or later people will see that this failure is not of first rate importance. Today the things of first rate importance in President Wilson's program are obscured by the failure of small things.

But in other years it will be said of President Wilson that he has had the courage to stand for peace, even when the price seemed at the moment high.

That he has established a trade commission which has an opportunity to bring about industrial peace and encourage honest competition.

That he has been firm and fair with all the belligerent nations in the European holocaust.

That he has got the very best results possible from a bad instrument in using the Democratic party, and that party only, as an organ of government.

That he has made the first sincere and fairly intelligent attempt to put the currency of the country upon a modern basis.

That while he has made some terrible mistakes in men, these mistakes were more than offset by his evident desire always to pick men of competence and of high character for places of great trust and responsibility.

And that above all he is imbued with a high devotion to an ideal of governmental efficiency and of governmental activity in affairs within the Nation, which he made his administration, on the whole, clean and dignified and effective. The President has moved things and has moved them forward. He has been surrounded by men who are not of his type intellectually, nor his equal in moral strength, nor politically of his way of thinking. They bear his party label, but they are not of his sort. These men have in a measure discredited the President temporarily. But they are incidents of a day. In the long run, when minor faults and small annoyances that now loom large are put in their proper perspective by time, it will be said of the President who ruled us from 1913 to 1915 that he was a man appointed for his time, who served his people honestly and well.

Building up the Navy.

Savannah News.

Efforts of "little navy" man and the realization that the government must practice economy in all its departments did not prevent the Sixty-third Congress from setting a new high record in naval appropriations. That was because it was recognized that it would be false economy to be niggardly with the navy that it would be wasting money to spend it on a navy that could be quickly wiped out in a fight with the navy of another first class power.

There may be differences of opinion as to whether heavy super-dreadnaughts, battle cruisers or submarines should be given most attention, but the people seem to be pretty well agreed that the United States should have an adequate navy, because upon our navy will rest in very large measure the burden of protecting our coasts if war comes. The last Congress authorized the construction of five great battleships, one to be built from the proceeds of the sale of two old vessels to

Greece, and provided also for a considerable fleet of underwater fighters.

It showed that it appreciated the value of aeroplanes in warfare by appropriating \$1,000,000 with which to build up a fleet of aeroplanes. The United States navy must be well rounded, must be equipped with all the latest instruments of war, must be supplied with auxiliary vessels in sufficient number, if it is to be depended upon to render good service in war. The value of aeroplanes to a fleet has been shown in a number of instances in the present war. Aviators have rendered every effective service by locating forts and hidden batteries along the Dardanelles and indicating their positions to the allied fleets in order that the ponderous guns of the warships might batter them to bits. Without the assistance of aviators the fleet would have a far more difficult task to perform than even now confronts it there.

Senator Bankhead claims to have had a settled conviction against the president ship bill, but he had to send for a representative of the shipping trust to find it for him.

The fellow who writes those cynical paragraphs about women for the big city papers is probably the happy husband of a good woman and the same kind of a father of nine children.

The sheriff pouring out that great quantity of stimulants yesterday is not calculated to have a very stimulating effect on the blind tiger business.

Spending most of the time attending to other people's business is one of the surest methods you can employ not to have one of your own to attend to.

Senator White performed so well on his first engagement he may be booked for a return engagement.

Maybe you've never been guilty of throwing away money but you feel that way when you have to pay street tax.

And W. O. W. Head Camp said we will also arise and go to Dothan.

Sheriff May is meeting the tigers half way in their work of bringing liquor into Dothan.

Dothan will soon be known as the convention city.

Dothan gets everything she goes after or sends after.

No; the water wagon does not haul fire water.

A Better Market

There is more to be expected of a market than merely a place to buy FRESH MEAT.

We have introduced the Dothan people to something new and novel in the market line.

We handle Hogshead Cheese, Weinerwurst, Liver Sausage, Bologna, then you can find the best cheese here you ever tasted. Brick Cheese. You are missing something every day you fail to try this delightful cheese.

Another thing that travel broadens is an unfounded, rumor.

Financing a run down automobile is an up hill business.

How to Advertise

Your Live Stock.

In the current issue of Farm and Fireside a contributor writes a practical article showing how live stock should be advertised. Following is an interesting extract:

"In making photographs of a dairy cow to bring out the qualities, first stand the animal on perfectly level ground.

"Do not put the front feet on lower or higher ground than the hind feet.

"Have the front feet placed well together and squarely under the body.

"Have the hind feet so placed that the leg on the side next the camera will be stretched back in such a way that a large part of the udder is plainly seen.

"Then hold the camera just a little back of the center so that you get a three-quarters view with the rear of the animal a little closer to the camera than the head. This will not only emphasize the development of the udder by bringing it more nearly into the foreground, but will also emphasize the dairy type, the wedge shape."

The photograph of a good cow is more attractive in an advertisement for dairy stock than the photograph of a bull. This is not merely a matter of theory; but has been proved again and again by dairy advertisers who have used photographs of both in their advertising matter.

"In selling heifers it has always been found that the ad which contained a photograph of one of the dams made more sales than one containing the photograph of the sire. Perhaps the reason for this is that the average dairyman is looking at the animal from the standpoint of milk production, and he sees more tangible indications in the female than in the male."

—The photograph of a good cow is more attractive in an advertisement for dairy stock than the photograph of a bull. This is not merely a matter of theory; but has been proved again and again by dairy advertisers who have used photographs of both in their advertising matter.

"In selling heifers it has always been found that the ad which contained a photograph of one of the dams made more sales than one containing the photograph of the sire. Perhaps the reason for this is that the average dairyman is looking at the animal from the standpoint of milk production, and he sees more tangible indications in the female than in the male."

5 Women Avoid Operations

For years we have been stating in the newspapers of the country that a great many women have escaped serious operations by taking Lydia E. Pinkham's Vegetable Compound, and it is true.

We are permitted to publish in this announcement extracts from the letters of five women. All have been recently received unsolicited. Could any evidence be more convincing?

1. HOSOPON, Me.—"I had pains in both sides and such a soreness I could scarcely straighten up at times. My back ached and I was so nervous I could not sleep, and I thought I never would be any better until I submitted to an operation, but I commenced taking Lydia E. Pinkham's Vegetable Compound and soon felt like a new woman."—MRS. HAYWARD SOWERS, Hodgdon, Me.

2. SHELBYVILLE, Ky.—"I suffered from a severe female trouble. My right side hurt me badly—it was finally decided that I must be operated upon. When my husband learned this he got a bottle of Lydia E. Pinkham's Vegetable Compound for me, and after taking it a few days I got better and continued to improve until I am now well."—MRS. MOLLIE SARRE, R.F.D., Shelbyville, Ky.

3. HANOVER, Pa.—"The doctor advised a severe operation, but my husband got me Lydia E. Pinkham's Vegetable Compound and I experienced great relief in a short time. Now I feel like a new person and can do a hard day's work and not mind it."—MRS. ADA WILT, 303 Walnut St., Hanover, Pa.

4. DECATUR, Ill.—"I was sick in bed and three of the best physicians said I would have to be taken to the hospital for an operation as I had something growing in my left side. I refused to submit to the operation and took Lydia E. Pinkham's Vegetable Compound—and it worked a miracle in my case, and I tell other women what it has done for me."—MRS. LAURA A. GATESWORTH, 2317 Cedar William Street, Decatur, Ill.

5. CLEVELAND, Ohio.—"I was very irregular and for several years my side pained me so that I expected to have to undergo an operation. Doctors said they knew of but one way that would help me. I took Lydia E. Pinkham's Vegetable Compound and I became regular and free from pain. I can thank God for such a good medicine and will always give it the highest praise."—MRS. C. H. HARRIS, 1598 Constant St., Cleveland, O.

Write to LYDIA E. PINKHAM MEDICINE CO., (COSTELLO) LYNN, Mass., for advice. Your letter will be opened, read and answered by a woman and held in strict confidence.

INTERNATIONAL HARVESTER MACHINES

Our Aim is to Explain International Harvester Engines

ALL the features of a good engine cannot be learned in a day. Yet every man who buys an engine should know all those features and should be able to make comparisons with any engine offered him.

There are certain features of design, material, machining and construction necessary to produce best results. These results are what you are interested in, because they mean economy and the ability to do your work.

The design is important. Of two engines with the same weight, same bore and stroke, running at the same speed, one will develop anywhere up to 50 per cent more horse-power than the other, and may last twice as long, simply because of difference in design.

International Harvester engines all have those features. The first time you are in town, drop in and we will show you some of the reasons why I.H.C. engines develop so much power and last so long.

The Wine of Life.

Three cups the Fates before me set,
And hide me choose;
One I might drink, the other two refuse.

Fame filled the first—a blood-red wine.
Sweet to the taste,
A bubbling cup I might not pass in haste.

Next wealth—a wine of sheer delight.

Mellow and old,
All dreams were answered in that cup of gold.

Beauty was last—a clear, white wine;
Ah, doubt was past!

I was a woman, and I chose the last.

—Lucy Eleanor Johnston.

St. Cecilia Club

A beautiful Spring day, a splendid program and a large attendance, made the meeting of the St. Cecilia Club, held on Thursday afternoon with Mrs. Eric Gellerstedt, one of the most interesting and enjoyable ones of the entire club year.

DeKoven was the subject for the afternoon's study, and Mrs. Ethel Williams the capable leader.

Mrs. Wharton and Misses Cain and Annie Dickinson were the guests of the club.

Cream and cake were served after the program. Mrs. Williams and Mrs. Gulson assisting the hostess.

The following program was given:

Bell Call: Current Musical Events.

The American Opera, "Papier," Miss Nettie Leslie.

DeKoven's Life, Mrs. Drewry Tay.

Story of "Robin Hood," Mrs. G. O. Gollon.

Plays: Waltzes from "Robin Hood," Mrs. Saxon Poyner.

Vocal Diet, "The Crimson Glow of Sunset," Miss Farmer and Mrs. Eric Gellerstedt, accompanied by Mrs. H. G. Forrester.

Mr. D. C. Carmichael, instrumental Solo, selected by Mr. H. Forrester.

Opera: "Caroline," has relatives in the audience, and

the audience—had
